

## **SPRINT #3 Report**

### **Actions to stop doing**

This sprint the group almost the project. Most tasks were complete and beyond functional. And we are ahead of the project.

### **Actions to start doing**

At this point, the only thing that the group might want to consider doing is coding together sometimes. Other than that, the group should continue to do what it is doing. Which, is utilizing the SCRUM principles to accomplish the tasks.

### **Work completed/not completed**

Babak and Justin finished the task about populating the home page UI using the data from the database, Anna finished the autocomplete/autofill for movie search, and also finished the user login part of part the project, and Joe successfully merged two movie and user databases into one database. Unit tests are left, and we are working on that part right now

### **Work complete**

During this sprint, the group has completed almost all user stories assigned in the sprint plan.
